4	LOD400	95%+
YRS EXP.	DELIVERY	CLASH RES.

BIM SOFTWARE

Autodesk Revit · Navisworks Manage · Autodesk Construction Cloud (ACC) · AutoCAD · SketchUp · 3ds Max

AUTOMATION

PyRevit · DiRoots · Dynamo · Parametric Families

RENDERING

Lumion · V-Ray · Enscape

STANDARDS & WORKFLOWS

ISO 19650 · IFC / openBIM · BEP · COBie · BCF · Scan-to-BIM · CAD-to-BIM · 4D BIM

COORDINATION

Clash Detection · Federated Model · CDE Management · QA / QC · Model Audit

EDUCATION

Construction & Operations Management in BIM
Engineers CAD Center (Autodesk Auth.) · Kozhikode
Mar 2023 – Aug 2023

Diploma in Interior Design
Vismayam College of Art & Media · Kozhikode
Oct 2021 – Aug 2022

B.E. in Civil Engineering
RVS Technical Campus · Coimbatore
Jul 2017 – Apr 2021

PROFESSIONAL SUMMARY

BIM Engineer with **4 years** of multi-disciplinary experience delivering complex projects across **India, the UAE, and Saudi Arabia**. Specialised in **Architectural, Structural, Facade and Steel BIM**, with a strong track record in **multi-disciplinary coordination**, ISO 19650-compliant **CDE management** and **LOD 300–400** model delivery. Achieved **95%+ pre-coordination clash resolution** across federated models in Navisworks. Proficient in **BIM automation** (PyRevit, DiRoots, Dynamo) and Scan-to-BIM workflows using FARO. Delivered landmark projects including **Wynn – Marjan Island** (UAE) and **EXIT 15 Al Nahda Entertainment Complex**, Entertainment, Snow Park and Water Park (Saudi Arabia), serving as **Team Lead** across all three packages.

PROFESSIONAL EXPERIENCE

BIM Engineer
VR4 BIM · Ernakulam, Kerala
Oct 2025 – Present

- Appointed as **Team Lead** for the EXIT 15 – Al Nahda project (Saudi Arabia), overseeing BIM delivery across three packages, Entertainment Complex (ECO), Snow Park and Water Park, coordinating a team of modellers and ensuring consistent LOD compliance and submission quality
- Developed **custom parametric curtain panel families** and deployed façade systems compliant with IFC openBIM standards for formal municipal BIM submissions, maintaining geometry-data fidelity across design and fabrication stages
- Led **steel support modelling** and coordination of complex theming steel connections for large-scale entertainment attractions, resolving structural clashes and producing fabrication-ready layout and shop drawing packages
- Executed **multi-discipline clash detection cycles** in Navisworks Manage across federated Architectural, Structural, MEP and Facade models, achieving 95%+ clash resolution pre-construction, significantly reducing on-site RFIs and rework
- Produced **façade layout drawings, steel layout sheets, and detailed joinery sheets** with full construction and fabrication detail, aligned to client and consultant deliverable requirements
- Administered project **CDE** on Autodesk Construction Cloud (ACC) under ISO 19650, enforcing naming conventions, revision control, and multi-stakeholder approval workflows

BIM Engineer (Project Associate L1)
Desapex · Bengaluru, Karnataka
Feb 2024 – Sep 2025

- Developed **Architectural and Structural BIM models up to LOD 400** for commercial, residential and industrial projects, ensuring fabrication-level accuracy and constructability review compliance across all deliverables
- Executed **CAD-to-BIM and Scan-to-BIM conversions** using Revit and FARO, including full point cloud registration for a 74,000 sq.m corporate campus (SAP Labs) and a 24,000 sq.m parking facility
- Coordinated across **Architectural, Structural and MEP disciplines** under ISO 19650 delivery framework, facilitating inter-team clash resolution via BCF reports and managing model handover at defined project milestones
- Utilised **PyRevit and DiRoots** for BIM automation (data extraction, parameter population, sheet automation), reducing repetitive task time and improving delivery efficiency across 5+ concurrent projects
- Built a reusable library of **parametric Revit families and standardised templates**, improving team-wide modelling consistency and significantly reducing rework cycles
- Delivered **large-scale point cloud-based steel modelling** using Revit and FARO for a 250-acre ONGC oil & gas facility (Uran, Maharashtra), producing accurate structural sheets for plant health assessment

BIM Modeler (Intern)
Insight BIM · Kozhikode, Kerala
Sep 2023 – Nov 2023

- Converted 2D CAD drawings into a **fully coordinated BIM model at LOD 300** for a G+2 data centre facility, meeting client submission standards and internal QA/QC benchmarks without errors
- Participated in **model health checks and QA/QC review cycles**, identifying and resolving modelling inconsistencies prior to formal submission milestones

Architectural Visualizer
Zipline Constructions · Kozhikode, Kerala
Aug 2022 – Jul 2023

- Produced **architectural BIM models and drawing sets** in Revit alongside 3D layouts in AutoCAD and SketchUp for residential and commercial projects
- Delivered **photorealistic visualisations** using Lumion and V-Ray to support client presentations, design approvals, and marketing deliverables

KEY PROJECTS

★ TEAM LEAD

EXIT 15 – Theming Support Steel

SA Al Nahda Entertainment Complex · Riyadh, Saudi Arabia

- Led BIM team delivering **structural theming steel connections and support frameworks to LOD 350+** across all three areas (Entertainment Complex ECO, Snow Park and Water Park), managing modellers, coordinating deliverables, and overseeing CDE workflows on Autodesk Construction Cloud (ACC) under ISO 19650
- Modelled complex **theming steel framing, connections, and support structures** in Revit across all three project areas, resolving structural clashes with Architectural and MEP models prior to fabrication and shop drawing issue
- Produced coordinated **steel layout sheets and fabrication drawing packages**, ensuring all documentation met project milestones, LOD compliance requirements, and contractor submission standards

EXIT 15 – Rainscreen Facade Cladding

SA Al Nahda Entertainment Complex – Water Park · Riyadh, Saudi Arabia

- Modelled **rainscreen cladding and curtain wall facade systems** for the Water Park area, working from IFC specifications and design intent drawings to maintain geometry-data fidelity across all facade panels
- Placed **parametric curtain panel families** per IFC model requirements and produced detailed **facade layout co-ordination sheets and fabrication drawings** aligned with client and consultant deliverable requirements
- Collaborated with the structural steel team to **resolve facade-to-structure interface clashes** in Navisworks, ensuring a fully clash-free coordinated model prior to shop drawing issue and fabrication

Wynn – Marjan Island

AE Ras Al Khaimah, UAE · Luxury Hospitality

- Created **parametric curtain panel families** from IFC model specifications for a world-class luxury hospitality mega-development, maintaining geometry-data fidelity across all facade panels
- Produced **façade layout documentation** coordinating between design, execution, and fabrication teams, ensuring full LOD and IFC openBIM compliance at all delivery milestones
- Ensured accuracy of **curtain wall systems and facade panel geometry** through rigorous QA/QC checks aligned to client and consultant submission requirements

★ TEAM LEAD

ITC Green Centre – 15-Story Commercial Tower

IN Bengaluru, India · Commercial

- Led BIM delivery for a 15-storey commercial tower, developing **advanced parametric facade families** and coordinating across Architectural and Structural disciplines
- Performed **clash detection and constructability review** across all disciplines, resolving coordination issues prior to construction documentation issue
- Managed team deliverables including **coordinated BIM models, facade layout sheets, and structural documentation** for client and consultant review and sign-off

SAP Labs – Urban Eco Campus

IN Bengaluru, India · Corporate Campus

- Multi-disciplinary BIM for a **74,000 sq.m office campus + 24,000 sq.m parking facility** via CAD-to-BIM and Scan-to-BIM workflows using FARO point cloud equipment
- Led **point cloud registration, alignment, and as-built verification** across the entire campus, ensuring accuracy of the existing conditions model for design and coordination
- Delivered coordinated **architectural and structural BIM models** used for design review, clash detection, and construction documentation across all disciplines

ONGC – Oil & Gas Facility (250 acres)

IN Uran, Maharashtra · Industrial

- Delivered **large-scale point cloud-based steel modelling** using Revit and FARO for structural health assessment across a 250-acre oil and gas industrial plant
- Produced accurate **structural sheet documentation** directly from the point cloud model for plant condition assessment and detailed engineering reporting
- Performed **Scan-to-BIM conversion** of complex industrial steel structures, maintaining precise dimensional accuracy against as-built FARO scan data throughout

Tata Realty – Aveza High-Rise Residential

IN Mulund, Mumbai · Residential

- Led end-to-end **architectural and structural BIM** for a high-rise residential tower with an integrated nursing home facility across multiple floors
- Managed **linked models, worksets, and clash detection** to produce a fully coordinated federated model, facilitating co-ordinated multi-discipline delivery
- Produced complete **detailed documentation packages** including floor plans, sections, elevations, and structural layout sheets for construction and consultant review

THE ISLAND – Interior Design

AE Dubai, UAE · Interior Fit-Out

- Developed **detailed joinery families and interior fit-out components** in Revit with full construction and fabrication details for a high-end interior project in Dubai
- Managed multiple revision cycles incorporating **client and consultant comments** through coordinated model updates and detailed joinery sheet reissues
- Produced **joinery layout sheets and detailed fabrication drawings** aligned with design intent and construction requirements, supporting efficient and accurate site delivery
